

SUCCESSFUL CATARACT SURGERY FOR BABY SAMANTHA

Mombasa Eye Hospital & Laser Centre performed a successful cataract eye surgery for a 4 month old baby and both eyes operated under general anaesthesia. The surgery was performed by Dr. Shaffiq Jafferji, an eye specialist from Nairobi. The anaesthesia part was handled by Dr. Noor Mohamed. The surgery was sponsored by Mrs. Aisha from UK and Miss Nafisa Khanbhai of Mombasa. We would sincerely like to thank Mrs. Tarah Khan who assisted the needy for getting the sponsor. The mother of the baby really appreciated and thanked the hospital and the donor for their support.
